

6. Project Documentation

Module Description

Visitor Registration Module

Stores visitor details in ServiceNow.

AI Recommendation Module

Generates recommendations based on visitor purpose.

Notification Module

Sends email notifications.

Reporting Module

Creates visitor reports.

Dashboard Module

Displays analytics using charts.

Testing Strategy

Test Case 1

Input: Mobile Number = 9876543210

Expected Result: Record Submitted Successfully

Test Case 2

Input: Mobile Number = 12345

Expected Result: Error Message Displayed

7. Project Demonstration

Step-by-Step Execution

Step 1

Open Visitor Request Form

Step 2

Enter Visitor Details

Step 3

Submit Record

Step 4

System Generates Visitor ID

Step 5

AI Recommendation Generated

Step 6

Email Notification Sent

Step 7

Check In Visitor

Step 8

Check Out Visitor

Step 9

View Dashboard and Reports

Advantages

- Easy Visitor Registration
- Improved Security
- Automated Notifications
- AI Recommendations
- Real-Time Tracking

Results

The system successfully automated visitor management and reduced manual work.

Future Scope

- QR Code Integration
 - Face Recognition
 - WhatsApp Notifications
 - AI Chatbot Support
-

Conclusion

The AI-Powered Smart Visitor Management System was successfully developed using ServiceNow. The system automates visitor registration, notifications, AI recommendations, tracking, reports, and dashboards, improving efficiency and security.
